ALEX CHEN
Computer Science & Engineering | alex.chen@example.edu | github.com/alexchen

TECHNICAL SKILLS
Languages: Python, SQL, Java, JavaScript, HTML, CSS
Frameworks & Tools: FastAPI, REST API, Git, Docker, PostgreSQL

PROJECTS
Student Attendance & Records Portal (Python, SQL, FastAPI)
- Developed a high-performance backend application using Python and SQL to manage over 1,500 student reco
- Designed and implemented REST API endpoints using FastAPI for secure student account verification and aut
- Configured automated database indexing and query optimization using SQL to reduce query latency by 35%.

Academic Portfolio & Course Management
- Completed advanced coursework covering OOP principles, software design patterns, and relational data mode
- Built command-line utilities in Python for batch file processing and student grade computation.
- Version-controlled collaborative team assignments using Git and GitHub workflows.

EDUCATION
B.S. in Computer Science - Expected May 2026
